UltraPulse® Technology: The Gold Standard

UltraPulse®

- Highest peak power
- Deepest impact
- Narrow, controlled thermal zone

UltraPulse DeepFX Mode

10mJ, 120µm spot/3 days post

Up to 4mm in a single pulse

Continuous Wave (CW)

- Low peak power
- Superficial impact
- Wider thermal zone

Continuous Wave Lasers

10mJ, 120µm spot/3 days post

Optimal ablation/coagulation rate

When ablation depth is equal, more energy means more excess heat in the tissue.

UltraPulse® technology enables the deepest penetration with the lowest energy.

This reduces patient discomfort, downtime and risk of side effects.

UltraPulse® also enables the shortest pulses per energy level further enhancing patient safety.
